Ref: CV, Inc.
Engineer of Record
416 Hungerford Drive # 301
Rockville, MD 20850

To Whom This May Concern:

Potomac Construction Company, Inc. (PCCI) has been working on WMATA projects for past several years. Currently PCCI has been awarded the BUS 1 Design Build Contract. As a part of the project, PCCI awarded a few tasks to CV, Inc. for completing design and permitting. We have been thoroughly pleased with the professionalism shown by the company and Mr. Chinmay G. Vyas, PE, CFM, LEED®AP BD+C, in handling all tasks, small and big.

In general CV, Inc. has been very diligent in performing services and tracking progress from both cost perspective and approvals perspective. In particular on an emergency parking project, Mr. Vyas did an excellent job of defining and prioritizing the permitting process even as, the permitting process was changing in real time. Our client, WMATA really appreciated the quick turn-around in design and permitting that CV, Inc. was able to handle for us. Our construction superintendent is very happy with the on-time and on-call services provided by CV, Inc.

CV, Inc. has a great understanding of the Design Build process and we definitely will keep using the services of CV, Inc. for more and more projects.

If additional information is required, please do not hesitate to contact me at (301) 386-3030.

Sincerely,

Yogesh Patel
Project Manager
